AUTHOR INDEX

Aasland, R., see Holck, A. (908) 188
Allan, J., see Puigdomenech, P. (908) 70
Andersen, H.A. and Islin, H.
Peptides regulate the activity of RNA polymerases in *Tetrahymena* (908) 1
Ashikawa, I., Kinosita, Jr., K., Ikegami, A. and Tobita, T.
Changes of the DNA packaging mode during boar sperm maturation (908) 263

Baldwin, J.P., see Stone, G.R. (908) 34
Basham, C., see Knox, R.J. (908) 214
Bensadoun, A., see Strieleman, P.J. (908) 268
Bonham, K., see Price-Haughey, J. (908) 158
Brams, P., see Østergaard, E. (908) 150
Bröker, M., Ragg, H. and Karges, H.E.
Expression of human antithrombin III in *Saccharomyces cerevisiae* and *Schizosaccharomyces pombe* (908) 203

Carpenter, B.G., see Stone, G.R. (908) 34
Caruso, A., see Horan Hand, P. (908) 131
Charles, R., see De Groot, C.J. (908) 231
Collins, A.
Estimates of the rate of ligation during excision repair of ultraviolet-damaged DNA in mammalian cells (908) 103
Crane-Robinson, C., see Puigdomenech, P. (908) 70

De Groot, C.J., Ten Voorde, G.H.J., Van Andel, R.E., Te Kortschot, A., Gaasbeek Janzen, J.W., Wilson, R.H., Moorman, A.F.M., Charles, R. and Lamers, W.H.
Reciprocal regulation of glutamine synthetase and carbamoylphosphate synthetase levels in rat liver (908) 231
Di Pasquale, G., see Tiboni, O. (908) 113
Doering, J.L., see Hoyle, H.D. (908) 224
Dunn, L.A., see Yarbrough, P.O. (908) 21
Duran, H.L. and Wani, A.A.
Site-specific gap-misrepair mutagenesis by O^4-ethylthymine (908) 60

Friedlos, F., see Knox, R.J. (908) 214

Gaasbeek Janzen, J.W., see De Groot, C.J. (908) 231
Gedamu, L., see Price-Haughey, J. (908) 158
Gerst, C. and Jacob, M.
Nuclear non-polyadenylated RNAs containing the first intervening sequence of the major late premessenger RNA from adenovirus-2: characterization and distribution in ribonucleoproteins (908) 251
Giancotti, V., see Puigdomenech, P. (908) 70
Gross, M. and Redman, R.
Effect of antibody to the hemin-controlled translational repressor in rabbit reticulocyte lysate (908) 123
Gutierrez, C., see Hernandez, P. (908) 293

Haarr, L., see Holck, A. (908) 188
Hamburger, J., see Roguel, N. (908) 12
Hayden, M.A., see Yarbrough, P.O. (908) 21
Hecht, R.M., see Yarbrough, P.O. (908) 21
Hernandez, P. and Gutierrez, C.
Uracil-DNA glycosylase activity is modulated by the proliferation rate and is lost upon differentiation of *Allium cepa* root cells (908) 293
Hibbs, A.R., Maheshwari, K.K. and Marzuki, S.
Assembly of the mitochondrial ribosomes in a temperature-conditional mutant of *Saccharomyces cerevisiae* defective in the synthesis of the var1 protein (908) 179
Holck, A., Lossius, I., Aasland, R., Haarr, L. and Kleppe, K.
DNA- and RNA-binding proteins of chromatin from *Escherichia coli* (908) 188
Horan Hand, P., Vilasi, V., Caruso, A. and Schlom, J.
Absolute values of *ras* p21 defined by direct binding liquid competition radioimmunoassays (908) 131
Horowitz, P., see Lee, J.C. (908) 109
Hoyle, H.D. and Doering, J.L.
DNAase I sensitivities in chromatin of the *Xenopus laevis* somatic and oocyte 5 S DNAs (908) 224

Ikegami, A., see Ashikawa, I. (908) 263
Islin, H., see Andersen, H.A. (908) 1

Jacob, M., see Gerst, C. (908) 251
Jonák, J. and Rychlík, I.
Reactivity of essential histidine residues in EF-Tu · GDP and EF-Tu · GTP from *Escherichia coli* (908) 97

Karges, H.E., see Bröker, M. (908) 203
Kimura, T. and Takeya, T.
Nuclease S1-sensitive sites on superhelical DNA molecules carrying the LTR region of Moloney murine leukemia virus (908) 285
Kinosita, Jr., K., see Ashikawa, I. (908) 263
Klass, M.R., see Yarbrough, P.O. (908) 21
Kleppe, K., see Holck, A. (908) 188
Knox, R.J., Lydall, D.A., Friedlos, F., Basham, C. and Roberts, J.J.
The effect of monofunctional or difunctional platinum adducts and of various other associated DNA damage on the expression of transfected DNA in mammalian cell lines sensitive or resistant to difunctional agents (908) 214

Kotler, M., see Roguel, N. (908) 12
Krauss, G., see Reckmann, B. (908) 90

Lamers, W.H., see De Groot, C.J. (908) 231
Laurent, M., Martin, G.R. and Sobel, M.E.
Cell-free translation products of basement membrane RNA from the EHS tumor (908) 241
Lee, J.C. and Horowitz, P.
Tritium exchange kinetics of yeast ribosomal subunits (908) 109
Lossius, I., see Holck, A. (908) 188
Lundblad, D., see Sundström, S. (908) 275
Lundgren, E., see Sundström, S. (908) 275
Lydall, D.A., see Knox, R.J. (908) 214

Maheshwari, K.K., see Hibbs, A.R. (908) 179
Martin, G.R., see Laurent, M. (908) 241
Marzuki, S., see Hibbs, A.R. (908) 179
Moorman, A.F.M., see De Groot, C.J. (908) 231

Nielsen, O.F., see Østergaard, E. (908) 150
Nilsson, L., see Nygård, O. (908) 46
Nussinov, R.
Asymmetry in the distributions of the four nucleotides at mRNA initiation and 3′ termini sites: some geometrical implications (908) 143
Nygård, O. and Nilsson, L.
The ribosomal binding site for eukaryotic elongation factor EF-2 contains 5 S ribosomal RNA (908) 46

Østergaard, E., Brams, P., Westergaard, O. and Nielsen, O.F.
Purification and characterization of an inducible mitochondrial DNA polymerase from *Tetrahymena thermophila* (908) 150

Peterson, R.C.
Sequence and transcription of $tRNA^{Val}$ gene from *Xenopus laevis* (908) 81
Price-Haughey, J., Bonham, K. and Gedamu, L.
Metallothionein gene expression in fish cell lines: its activation in embryonic cells by 5-azacytidine (908) 158
Puigdomenech, P., Romero, M.C., Allan, J., Sautière, P., Giancotti, V. and Crane-Robinson, C.
The chromatin of sea urchin sperm (908) 70

Ragg, H., see Bröker, M. (908) 203
Reckmann, B. and Krauss, G.
The cleavage of single-stranded DNA by the isoschizomeric restriction endonuclease *Hha*I and *Cfo*I (908) 90
Redman, R., see Gross, M. (908) 123
Relevi, H., see Roguel, N. (908) 12
Rill, R.L., see Rowland, R.D. (908) 169
Roberts, J.J., see Knox, R.J. (908) 214
Roguel, N., Relevi, H., Hamburger, J. and Kotler, M.
Genetic alterations of integrated avian sarcoma virus DNA sequences in transformed rat cells (908) 12
Romero, M.C., see Puigdomenech, P. (908) 70
Rowland, R.D. and Rill, R.L.
Atypical changes in chromatin structure during development in the sea urchin, *Lytechinus variegatus* (908) 169
Rychlík, I., see Jonák, J. (908) 97

Sautière, P., see Puigdomenech, P. (908) 70
Schlom, J., see Horan Hand, P. (908) 131
Sieliwanowicz, B.
The influence of poly(A)-binding proteins on translation of poly(A)$^+$ RNA in a cell-free system from embryo axes of dry pea seeds (908) 54
Sobel, M.E., see Laurent, M. (908) 241
Stone, G.R., Baldwin, J.P. and Carpenter, B.G.
Polyamines permit the preparation of stable *Physarum* core particles which have a structure similar to those from higher eukaryotes (908) 34
Strieleman, P.J. and Bensadoun, A.
Cell-free translation of avian adipose tissue lipoprotein lipase messenger RNA (908) 268
Sundström, S., Lundblad, D. and Lundgren, E.
Interferon inhibits preferentially the synthesis of proteins associated with growth stimulation of Swiss 3T3 mouse fibroblasts (908) 275

Takeya, T., see Kimura, T. (908) 285
Te Kortschot, A., see De Groot, C.J. (908) 231
Ten Voorde, G.H.J., see De Groot, C.J. (908) 231
Tiboni, O. and Di Pasquale, G.
Organization of genes for ribosomal proteins S7 and S12, elongation factors EF-Tu and EF-G in the cyanobacterium *Spirulina platensis* (908) 113
Tobita, T., see Ashikawa, I. (908) 263

Van Andel, R.E., see De Groot, C.J. (908) 231
Vermersch, P.S., see Yarbrough, P.O. (908) 21
Vilasi, V., see Horan Hand, P. (908) 131

Wani, A.A., see Duran, H.L. (908) 60
Westergaard, O., see Østergaard, E. (908) 150
Wilson, R.H., see De Groot, C.J. (908) 231

Yarbrough, P.O., Hayden, M.A., Dunn, L.A., Vermersch, P.S., Klass, M.R. and Hecht, R.M.
The glyceraldehyde-3-phosphate dehydrogenase gene family in the nematode, *Caenorhabditis elegans*: isolation and characterization of one of the genes (908) 21
